PHAM DUC THINH

JAVA BACKEND DEVELOPER

Location: Ha Noi, Viet Nam **Phone:** 0329060633 **Email:** phamducthinhbeo@gmail.com **Experience:** 4 Years

PROFESSIONAL SUMMARY

Java Backend Developer with **4 years** of full-time experience specializing in building scalable backend services, high-performance RESTful APIs, and real-time enterprise platforms. Highly proficient in the **Java/Spring ecosystem (Spring Boot, Spring MVC, Spring Data JPA)** alongside hands-on flexibility in **Node.js** and **PHP (Laravel)**. Demonstrated expertise in **RESTful APIs, GraphQL**, security architectures (**JWT, OAuth2**), and relational database optimization (**PostgreSQL, MySQL, Oracle, SQL Server**) as well as **Redis caching**. Proven track record in Docker containerization, CI/CD integration, asynchronous task processing (**RabbitMQ/Kafka**), and technical documentation. Adept at cross-functional collaboration with BA, UI/UX, Tester, and DevOps teams in Agile/Scrum environments.

TECHNICAL SKILLS

Backend Development	Java, Spring Boot, Spring MVC, Spring Data JPA, OOP, Clean Code, PHP (Laravel), Node.js
API & Architecture	RESTful APIs, GraphQL, Swagger/OpenAPI, Centralized Error Handling, CORS, Data Validation, JWT, OAuth2
Database & Caching	PostgreSQL, MySQL, Oracle, SQL Server, Redis, Query Tuning, Indexing, Schema Design, Data Integrity
DevOps & Messaging	Docker, Containerization, Staging/Production Deployment, Git, GitHub Actions, RabbitMQ, Kafka, WebSockets
Processes & Quality	Agile/Scrum, Code Review, Unit Testing (JUnit), Logging & Monitoring, Technical Documentation (BRD/Design Specs)

WORK EXPERIENCE

Fabbi JSC | *Backend Developer / Scrum Backend Developer* — 07/2022 – Present

1. JSport On Demand *(Team size: 6)* — 12/2023 – Present

Large-scale television program data management, normalization, and cross-platform reconciliation platform.

- **Architecture & API Engineering:** Surveyed business requirements and engineered backend services for cross-platform data normalization; built high-throughput RESTful APIs with strict validation and centralized error handling.
- **Database & Query Optimization:** Designed relational schemas and tuned complex SQL queries in MySQL/PostgreSQL, ensuring data integrity and peak operational efficiency under heavy load.
- **Cross-Functional & Deployment:** Collaborated with BA, UI/UX, QA, and Frontend teams to clarify business logic; executed Docker containerization and supported staging/production deployments.

Tech stack: Java, Spring Boot, RESTful API, PostgreSQL, MySQL, Docker, Staging/Production Deployment

2. Bingo Realtime System *(Team size: 7)* — 05/2023 – 11/2023

Real-time online entertainment gaming platform supporting low-latency multiplayer rooms and instant synchronization.

- **Core Services & Security:** Developed core backend services and optimized low-latency APIs; implemented robust JWT & OAuth2 authentication and documented API specs using Swagger.
- **Async Task & Real-time Integration:** Integrated RabbitMQ / Cloudflare Queues for asynchronous task processing and WebSockets for real-time game state synchronization.
- **Containerized Ops:** Utilized Docker for service containerization, monitoring logs, and maintaining high availability across live services.

Tech stack: Java, Spring Boot, RESTful APIs, PostgreSQL, Redis, RabbitMQ, WebSockets, JWT, Docker

3. Workation – Flight Booking Platform *(Team size: 6)* 10/2022 – 04/2023

Online flight booking platform providing real-time flight search, schedule management, and third-party payment integration.

- **Requirement Analysis & Schema Design:** Extracted business rules from BRDs, designed relational database schemas, and optimized SQL performance through strategic indexing.
- **Third-Party API Integration:** Developed RESTful APIs connecting search and payment processing services with external providers.
- **Technical Documentation:** Created detailed technical design and API documentation (Swagger); assisted DevOps in Docker-based deployments.

Tech stack: Java, Spring Boot, RESTful API, MySQL, SQL Optimization, Docker, Postman, Git

4. TekkoBM & Access Control System *(Team size: 6)* 07/2022 – 09/2022

Building access control and internal HR management system featuring QR check-in and multi-channel notifications.

- **Feature Development:** Designed schemas and developed RESTful APIs handling access log tracking, multi-channel notifications, and operational reporting.
- **Agile Operations:** Participated actively in Agile/Scrum ceremonies, code reviews, Docker deployments, and live production support.

Tech stack: Java, Spring Boot, RESTful API, MySQL, SQL Optimization, Docker, Postman, Git

SapotaCorp | *Backend Developer* **02/2021 – 06/2022**

5. COMBINESELL – Multi-Channel E-Commerce System *(Team size: 8)* 02/2021 – 06/2022

Multi-channel e-commerce management platform integrating major marketplaces (Shopee, Lazada, Amazon) for centralized inventory and order sync.

- **E-Commerce API Integration:** Integrated third-party marketplace APIs for real-time inventory and order sync; authored clean OOP backend code and custom SQL migration scripts.
- **Maintenance & Operations:** Analyzed system logs, resolved production bug reports, and optimized existing data processing pipelines.

Tech stack: Java, Spring Boot, RESTful API, MySQL, SQL Tuning, Postman, Git

EDUCATION

University of Transport and Communications (UTC)
Engineer's Degree – Major in Information Technology (Ha Noi, Viet Nam)
