NGUYEN QUANG HUY

JAVA DEVELOPER

Thanh Hoa, Vietnam | 0705903155 | huynq.2k2.dev@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Java Developer with approximately 2 years of experience developing backend and full-stack applications using Java, Spring Boot, and Angular. Experienced in RESTful APIs, microservices, Camunda-based workflows, digital-signing platforms, and financial-management systems. Strong hands-on experience in performance optimization, database queries, third-party integrations, CI/CD, and delivering features across frontend, backend, and database layers.

TECHNICAL SKILLS

Backend: Java 8/17, Spring Boot, Spring Data JPA, Hibernate, Spring Security, RESTful API, Microservices
Frontend & Workflow: Angular, Camunda, Feign Client
Database & Integration: PostgreSQL, MySQL, QueryDSL, Native SQL, Liquibase, Redis, RabbitMQ, Kafka
Security & DevOps: JWT, OAuth2, Docker, Docker Compose, GoCD, Jenkins, Maven, Gradle, Git, Linux

PROFESSIONAL EXPERIENCE

JAVA DEVELOPER | NGV Group — *Apr 2026 - Present*

EPAS - Financial Management System | *Spring Boot, Angular, Microservices, Camunda, PostgreSQL, Redis, QueryDSL*

- Translate BA process specifications into end-to-end features for LOAN and IBM modules across Angular, Spring Boot, and PostgreSQL.
- Design and implement RESTful APIs and inter-service communication using Feign Client.
- Implement Camunda workflows using User Tasks, Service Tasks, External Tasks, and process variables.
- Investigate and resolve BPM process failures, backend issues, and database-related problems.
- Develop data-access logic and complex queries using JPA, QueryDSL, and native SQL.

EPAS Mobile | *Spring Boot*

- Own complete backend features for authentication, OTP verification, fund information, fund transactions, and consultation scheduling.
- Integrate with shared authentication services and connected fund systems to retrieve transaction and fund information.

JAVA DEVELOPER | SoftDreams — *Mar 2025 - Apr 2026*

EasySign - Digital Signing System | *Spring Boot, Angular, RabbitMQ, Redis, GoCD, .NET*

- Developed new features and maintained the core digital-signing platform, including performance and code optimization.
- Optimized multi-hash signing with parallel processing, reducing processing time from approximately 5 seconds to 200 milliseconds.
- Developed a reusable .NET DLL so hospital HIS applications can call EasySign signing functions directly.
- Deployed EasySign databases and applications to servers at approximately 20 hospitals after infrastructure setup.
- Provided post-deployment maintenance, troubleshooting, and issue resolution for hospital environments.
- Participated in CI/CD deployment to development environments with GoCD and worked with Redis and RabbitMQ in the signing platform.

RemoteSigningHub - Digital Signing Gateway | *Spring Boot, Angular, Redis, GoCD*

- Independently developed a gateway flow that receives signing requests and routes them to third-party signing systems through REST APIs.
- Integrated MySign and NEAC using user-provided digital certificates as part of the signing flow.
- Optimized database queries and cached repeated data, reducing signing API processing time from seconds to milliseconds.

JAVA DEVELOPER | Viettel Software — *Sep 2024 - Mar 2025*

- Contributed to ViettelHome and PayPro projects using Java and Spring Boot.

PERSONAL PROJECT

MEMORIES - Digital Greeting Card Platform | *Spring Boot, React, PostgreSQL, MinIO, Docker Compose, JWT*

- Independently developing a web platform for creating personalized digital greeting cards for memorable occasions.
- Completed user registration, login, JWT-based authentication, and personalized card creation.
- Integrated MinIO for image storage and Docker Compose for the backend, PostgreSQL, MinIO, and supporting services.

EDUCATION & LANGUAGES

Bachelor's Degree in Software Engineering | Thuyloi University | Graduated May 2025
Languages: Vietnamese (Native); English (Basic working communication)
