VŨ ĐỨC HOÀN

JAVA BACKEND DEVELOPER

0908476658 | vuduchoan1601@gmail.com | Hà Nội | Date of Birth: 16/01/1988

PROFESSIONAL SUMMARY

Java Developer with 7+ years of experience developing web applications and enterprise systems. Strong experience with Java, Spring Boot, Spring MVC, MyBatis, RESTful APIs and relational databases. Experienced in requirement analysis, implementation, code review, troubleshooting and system maintenance. Hands-on experience with AWS services including S3, EC2, CloudWatch, Secrets Manager and SQS, as well as backend development with FastAPI/Python and frontend development with React/Next.js.

TECHNICAL SKILLS

Backend: Java, Java Core, Spring Boot, Spring MVC, JDBC, JSP/Servlet, MyBatis, RESTful API
Database: PostgreSQL, SQL Server, DB2, MySQL
Cloud / AWS: EC2, S3, SQS, CloudWatch, Secrets Manager
Frontend: ReactJS, Next.js, TypeScript, JavaScript, jQuery, Ajax, Bootstrap, DataTable
Other Backend: FastAPI, Python, PHP Lumen
Source Control: Git, SVN, Azure DevOps
IDE: IntelliJ IDEA, Eclipse, NetBeans, Visual Studio Code

WORK EXPERIENCE

OMINEXT GROUP | FullStack Software Engineer | Feb 2022 – June 2026

EDI Order Conversion and Management (3 months, 5 members)

- Developed responsive UI pages with Next.js App Router and integrated backend APIs.
- Implemented REST APIs with FastAPI/Python using Clean Architecture.
- Implemented secure configuration management with AWS Secrets Manager.
- Configured centralized logging with CloudWatch.
- Implemented multithreaded file processing and concurrent uploads to Amazon S3.
- Implemented REST API integration with an external AI OCR service for image processing and text extraction.
- Implemented asynchronous OCR processing using AWS SQS and a Python background worker.
- Implemented real-time job status tracking with Server-Sent Events (SSE), enabling backend job updates to be streamed to the frontend.

Technologies: Next.js 16, React 19, TypeScript, FastAPI, Python, AWS S3, CloudWatch, Secrets Manager, SQS

AI-Powered Construction Knowledge Management (3 months, 5 members)

- Developed responsive UI pages with Next.js App Router and integrated backend APIs.
- Implemented REST APIs with FastAPI/Python using Clean Architecture.
- Implemented secure configuration management with AWS Secrets Manager.
- Configured centralized logging with CloudWatch.
- Implemented concurrent asynchronous file uploads to Amazon S3 to improve responsiveness and allow users to continue working during uploads.
- Implemented REST API integration with an external AI Chat service
- Configured and maintained EC2 Linux instances for production deployment.

Technologies: Next.js 16, React 19, TypeScript, FastAPI, Python, AWS S3, CloudWatch, Secrets Manager, EC2

Manufacturing Operations / ECObjects Migration (6 months, 10 members)

- Developed a multi-threaded CSV data processing pipeline using batch processing and BlockingQueue to import large-scale sales and purchasing data into ECObjects.
- Performed coding, code review, testing and bug fixing.

Technologies: Java Core, MyBatis, PostgreSQL

Procurement Support / Supply Chain Management (6 months, 22 members)

- Analyzed and clarified requirements and implemented quotation-module functions.

- Developed RESTful APIs and business functions using Java Spring Boot and MyBatis.
- Worked with Azure Database for PostgreSQL.
- Performed code reviews, bug fixing and maintenance.

Technologies: Java, Spring Boot, RESTful API, MyBatis, PostgreSQL, Azure DB

Medical Appointment Scheduling System (1 year, 10 members)

- Analyzed and clarified requirements and implemented assigned functions.
- Developed REST APIs using PHP Lumen and MySQL.
- Implemented Register, Login and authentication functions.
- Implemented concurrency control to prevent double booking and ensure appointment slot consistency under concurrent requests.
- Implemented appointment reminder emails and automatic cancellation of past appointments.
- Developed responsive UI and integrated backend APIs using ReactJS.

Technologies: PHP Lumen, ReactJS, MySQL, Git, SVN

Medical Management System (2 years, 35 members)

- Analyzed and clarified customer requirements with team members.
- Developed business functions using Java Core, JDBC and JSP/Servlet.
- Implemented HTML/XSL report generation.
- Performed code reviews, bug fixing and maintenance.

Technologies: Java Core, JSP/Servlet, JDBC, JavaScript, Ajax, Bootstrap, DB2, Git, SVN

WORKLIFE JSC | FullStack Software Engineer | Jul 2019 – Jan 2022

Project: Building management software for state agencies in Khanh Hoa province (8 members).

- Analyzed and clarified customer requirements with team members.
- Designed and implemented reusable and reliable application functions.
- Developed business functions using Java Spring MVC, RESTful API and MyBatis.
- Implemented search functionality using DataTable.
- Implemented Word/Excel report import and export using JavaScript, Spring MVC and MyBatis.
- Performed bug fixing and system maintenance.

Technologies: Java, Spring MVC, JavaScript, MyBatis, SQL Server, PostgreSQL, jQuery, Ajax, Bootstrap, DataTable, SVN.

EDUCATION

Nong Lam University — Information Technology | 2014 – 2019

ADDITIONAL INFORMATION

- Able to work independently and collaboratively in a team.
- Able to learn and work with new programming languages and technologies.
